Education

Indian Institute of Information Technology, Allahabad

Bachelors in Information Technology (Business Informatics) CGPA: 8.67

Nov 2022 – Expected Jul 2026

Prayagraj, UP

Experience

Myntra Design Ltd.

Jan 2026 – Jul 2026

SDE (ML) Intern

Bangalore, India

- Architected a config-driven **PySpark ETL pipeline** for ~100M-row datasets, shrinking 30-day data refresh times from tens of hours to ~**1.5 hours**.
- Overhauled **User Vector processing** by eliminating legacy dependencies, achieving a **75% runtime cut** and an **85–90% reduction in compute costs**.
- Engineered 30+ new features and developed a **Spark-to-Aerospike connector**, boosting upload throughput **18x to 960K records per second**.
- Trained and registered a **DCN v2 ad ranking model** via MLflow, driving a **+2.2% AUC** and **+2.5% F1 lift** over the XGBoost baseline.
- Optimized model serving and integration, accelerating **GPU inference by 4x** (to 3–5ms) and reducing **ML prediction logging latency to 49ms p99**.
- Established **system observability** by deploying 4 P1 **Grafana dashboards** and **Zenduty alerts**, utilizing “Keep Last State” logic to eliminate false pages.

Flipkart

May 2025 – Jul 2025

SDE Intern

Bangalore, India

- Devised **Ratekeeper**, a production-grade **rate-limiting library** across 10+ **Spring Boot services**, eliminating 300+ lines of duplicated code/service and reducing integration time to **under 5 minutes**.
- Evaluated distributed rate limiting strategies to implement a **Bucket4j-based solution** with **Redis and Caffeine caching layers**, leveraging **atomic Lua scripts** for $O(1)$ state management and **sub-1ms fail-open overhead**.

Projects

Merchant Onboarding Agents | *Python/FastAPI, React/TS, AWS Bedrock* | Github

May 2026

- Shipped full-stack **FastAPI/JWT product** via **12-agent AWS Bedrock pipeline**.
- Implemented **RAG (Amazon Titan embeddings, sqlite-vec)** for 50+ **workflows** & evaluation harnesses.
- Designed **VLM workflows (Gemma, Qwen)** for 10K+ **classifications, extractions**, and real-time feedback.

GAN Augmentation with XAI | *Python, PyTorch, NumPy, Scikit-learn* | Github

Jan 2024 – May 2024

- Engineered **GANs (Vanilla, DC, W, VAE, BiLSTM)** augmenting **healthcare datasets**, reducing scarcity 40%.
- Integrated real-time **SHAP-based XAI** using **discriminator gradient analysis** to guide the generator.
- Achieved 25% **FID score reduction**, 15% **MSE improvement**, and 30% lower **synthetic image mode collapse**.

Achievements

- **LeetCode**: Highest rating **1799** (Top **7.62%** of 570k+ users)
- **GrabHack 2025**: National **Finalist**
- **EROH 2025** (Engineers’ Ring of Honour, Naukri Campus): **4th / 50,000+** at national level
- **CreaTech 2025** (Larsen & Toubro): **4th / 15,000+** National Finalists
- **Amazon Hack On 2025**: **Top 75** coder out of 52k+ registrations
- **UST D3CODE 2025**: Indian **Runner-Up**
- **AINCAT 2025** (Naukri Campus): Secured **335th / 50,000+** in national aptitude test & **Finwiz 1.0 Winner**
- **IEO 2019**: State-level **Gold Medalist** (Eduheal Foundation)

Positions of Responsibility

Gymkhana Senator, IIITA Senate

Mar 2023 – Apr 2024

- Represented **1,000+** students as Senator, orchestrating **10+ events** and shaping policies to boost engagement.

Technical Skills

Languages: Python, SQL, Java, C++, C, JavaScript/TypeScript, Lua, HTML, CSS

Developer Tools: Git, MLflow, AWS Bedrock, Docker, Kubernetes, Postman, Grafana, Zenduty, VS Code

Frameworks & Libraries: PyTorch, TensorFlow, PySpark, Spring Boot, XGBoost, Scikit-Learn, LangChain, FastAPI, React.js, Bucket4j, Caffeine

Cloud/Databases: Redis, Aerospike, Hive, MySQL, MongoDB, Vector DBs (Chroma, Pinecone, sqlite-vec), NoSQL, Azure Blob

Coursework: Data Structures & Algorithms, Object-Oriented Programming (OOPs), Operating Systems, DBMS, Machine Learning, Deep Learning, MLOps, Generative AI
