Subject: Application for Project Research Scientist-I (Innovation Fellow)

Dear Selection Committee,

I am writing to express my interest in the **Project Research Scientist-I (Innovation Fellow)** position at the National Center for Assistive Health Technology (NCAHT), AIIMS New Delhi.

I am currently pursuing a B.Tech in Information Technology (Business Informatics) at IIIT Allahabad and have developed a strong foundation in machine learning, deep learning, data engineering, and AI system development through internships and research-oriented projects. What excites me about NCAHT is the opportunity to apply these technical skills toward developing technologies that directly improve healthcare accessibility and quality of life.

During my internship at **Myntra**, I worked on large-scale machine learning systems where I built PySpark-based ETL pipelines, engineered production-ready features, trained and deployed deep learning models, and optimized inference pipelines for scalability and efficiency. These experiences strengthened my understanding of designing reliable AI solutions that perform effectively in production environments.

Previously, during my internship at **Nama Medicals**, I developed a real-time seizure detection pipeline using EEG signals. I worked on biomedical signal preprocessing, feature extraction, and deep learning-based classification, which introduced me to the unique challenges of applying artificial intelligence in healthcare. This experience reinforced my desire to work on technologies that create meaningful social impact.

Beyond internships, I have built AI-based healthcare and intelligent systems, including GAN-based medical data augmentation with explainable AI and multi-agent AI applications. These projects have strengthened my problem-solving skills and my ability to collaborate in multidisciplinary teams.

I am particularly interested in NCAHT's mission of identifying unmet clinical needs and translating innovative ideas into practical assistive technologies. If selected, I would be eager to contribute to the development of affordable AI-powered rehabilitation and assistive solutions that enhance patient independence while learning from clinicians, researchers, and innovators at AIIMS.

Thank you for considering my application. I would be honored to contribute to NCAHT's vision and look forward to the opportunity to discuss how my background and enthusiasm align with the goals of the Innovation Fellowship.

Yours sincerely,

Owaish Jamal
